

PDL URGENT UPDATE:

Thyroid Stimulating Immunoglobulin (TSI)

May 11, 2021

TEST UPDATE

Effective immediately, Pacific Diagnostic Laboratories (PDL) is sending **Thyroid Stimulating Immunoglobulin (TSI)** test requests to our referral lab Lab Corp. This change is due to vendor supply issues that they are unable to resolve.

A new test code has been created for the LabCorp test:

- **NEW: LAB10943 THYROID STIMULATING IMMUNOGLOBULIN (TSI)**

The existing test code will be deactivated once outstanding orders have been addressed:

- **DEACTIVE: LAB746 THYROID STIMULATING IMMUNOGLOBULIN**

For specimens already submitted for this testing, PDL will cancel and reorder under the new code. Testing will be submitted to LabCorp as soon as possible.

Thyroid Stimulating Immunoglobulin (TSI)		Performing Lab: LABCORP	
Lab Code: LAB10943	Test Code: 1230119055	TAT: 2-4 days	
Specimen Requirements			
<u>Specimen Type:</u> Serum or plasma (EDTA or Lithium heparin)			
<u>Specimen Container:</u> Red-top tube, gel-barrier tube, lavender-top (EDTA) tube or green-top (heparin) tube			
<u>Collection:</u> Serum or plasma must be separated from blood cells by centrifugation, ideally within 2 hours of collection. If red-top tube or plasma, transfer separated serum or plasma to a plastic transport tube.			
<u>Specimen Volume:</u> 3 mL (0.3 mL min volume)			
<u>Transport Temperature:</u> Room Temperature			

IT TEST BUILD/CHANGE INFORMATION				
NEW TEST	Order Code	Test Code	CPT	CDM
